

Cypress Continues CKD Awareness-Building During National Kidney Month

March is National Kidney Month – and Cypress is taking this opportunity to share the following information as part of its continuing efforts to help raise awareness for its employer-clients regarding the growing problem of CKD (chronic kidney disease). Not only does CKD negatively affect the health of our workers/members, but it also significantly increases health plan costs.

Cypress is finding success in addressing the negative impact on both fronts by offering its [Dialysis Claim Management & CKD Management Programs](#). As reported a year ago, Cypress's partnership with Renalogic had already resulted in improved health outcomes for members and a savings of millions of dollars. A key factor in these successes is [education](#) of both employers/plan managers and members themselves.

In support of our ongoing education efforts, we wanted to let you know that Cypress offers periodic webinars on these programs ([email to request more info](#)), and is also making available this [guest article from our partner, Renalogic](#), on the topic of kidney disease, dialysis, and how they can potentially be avoided.

For more information on this and other industry topics or Cypress services, please contact:
